

Risk analysis / Technical documentation according to EU 2023/988 §9 (2)*

for products not subject to other Union harmonisation legislation within the meaning of Section 3 (27)**

General information		Article photo
Date of first version	11-12-2024	(without packaging, complete set, representative items for groups)
If revisions to the risk analysis have been made, date of revision		
General article information		
Article name or article group name	STAIR RENOVATION WOOD HAND RAIL	
relevant HORNBACH article numbers****	4674236, 4674237, 4674260, 4674261, 4674264, 4674262, 4674263	
relevant supplier article numbers	22138, 22139, 22190, 22191, 22195, 22192, 22194	
relevant GTINs	See Part V	
Brands	Pertura	
General supplier information		
Name and address of the supplier	Deli-Home Netherlands B.V., Stadhuisplein 70, 4203 NS, Gorinchem	
General description of the product or article group (Internal Risk Analysis Part I)		
<p>Wooden handrails, to provide support and safety on stairs while enhancing the aesthetic of the space. These handrails are available in various thicknesses, shapes, finishes and lengths to suit diverse styles and installation requirements. The handrails are designed to be cut to size using a standard wood saw, allowing precise customization for specific stair dimensions. The endings need to be finished by using endcaps if cut to size.</p> <p>Types of wood: Oak, Pine, Hardwood.</p>		
Essential characteristics relevant for assessing its safety (Internal Risk Analysis Part II)		
<p>Handrails must be securely fixed to the wall or balustrade using suitable handrail brackets and mounting hardware. Regular inspections are required to verify the structural integrity of the handrail.</p>		

Adequacy check (according to §9 (2) S.2 EU 2023/988 ***)		
Analysis of the risks potentially associated with the product in terms of possible hazards(Sheet 4)		
Brief description of the risks		
The following points must be taken into account when analysing the possible risks: - the aspects for assessing safety (page 1) - all phases of the life cycle (page 2) - the different consumer categories (Sheet 3)	Improper installation or damage handrail can create uneven surfaces or sharp edges, increasing the risk of injuries. Poorly secured or loose components can lead to accidents. Please note that the edges of the product may be sharp after cutting to size, adhere strictly to the safety guidelines provided by the saw supplier.	
Risk assessment		
There is a risk of confusion with food due to smell, appearance, shape, packaging, product presentation of the item.		<input type="radio"/> Yes <input checked="" type="radio"/> No
There is a risk of confusion with toys due to smell, appearance, shape, packaging, product presentation of the item.		<input type="radio"/> Yes <input checked="" type="radio"/> No
The product exhibits under normal and foreseeable use a specific increased risk for the following groups of people: infants, toddlers, children, people with reduced abilities, pregnant women, (see Sheet 3 consumer categories).		<input type="radio"/> Yes <input checked="" type="radio"/> No
Product or a substance can cause a negative influence on the environment by its intentional or unintentional release.		<input type="radio"/> Yes <input checked="" type="radio"/> No
Dangers may arise through an influence of the product to be assessed on other products or through the influence of other products on this product.		<input type="radio"/> Yes <input checked="" type="radio"/> No
All risks associated with the product are assessed negligible, taking into account the likelihood and extent of damage.		<input checked="" type="radio"/> Yes <input type="radio"/> No
RESULT:	The risk analysis part 1 and part 2 are sufficient. Parts III and IV do not need to be completed.

Part III- Risk assessment

When filling out the forms, please pay attention to the cell color: Input types
white = input as free text
light blue = input via pull-down menu or free text
dark blue = input only possible via pulldown
grey = no input necessary, field is filled automatically
= Checkbox. Please tick accordingly.

Probability of occurrence of harm		
SW		
Level	How likely is damage?	Probability of harm during the expected lifetime of the product
1	very low	< 0.001%
2	small amount	> 0.001%
3	medium	> 0.01%
4	high	> 1%
5	very high	> 10%

Severity of harm (Rapex)			
S.A.			
1	2	3	4
slightly	medium difficulty	serious	critical
Injury or sequelae which, after immediate measures have been taken (first aid, usually not by a doctor), does not cause significant impairment of function or great pain; the sequelae are usually completely reversible.			
Injury or sequelae that require outpatient treatment, but usually not inpatient treatment. Function may be impaired for a limited period of time (maximum six months); almost complete recovery is possible.			
Injury or sequelae that usually requires inpatient treatment and results in functional impairment for at least six months or in permanent loss of function.			
Injury or sequelae that results in or could result in death, including brain death; reproductive toxicity; loss of limb or severe impairment of function resulting in a disability of more than approximately 10%.			

Risk level		Extent of damage S.A.				Risk levels	
		1	2	3	4	E	E – Serious risk
Probability of damage	SW	5	H	E	E	E	H – High risk
	4	M	H	E	E	H	M – Medium risk
	3	N	M	H	H	M	N – Low risk

Letter of Correspondance

We hereby declare that the following articles do not differ in terms of their risk assessment.
The risk assessment can therefore be carried out for the entire group of articles instead of carrying out an individual risk assessment for each article.
